If you somehow notice anything missing please contact: info@rebosystems.com

2 SWITCHING THE MACHINE ON

In order to turn on your SMS-R1 you will need to connect the power cable.

Attention: Do not connect the USB yet

Place the SMS-R1 on
a steady surface

Connect the power cable

Turn your printer ON

LOADING THE SUPPLIES

3 LOADING THE SUPPLIES

In order to start using your SMS-R1 you will need to insert two things:

A Ink ribbon cassette

B Printable tape roll

A Loading the ribbon cassette

1. Make sure the cassettes' closed cap is facing you and the open caps are pointing towards the printer
2. Make sure the flat side of the cassette is faced upwards
3. Insert the ribbon cassette from the side of the printer. If you notice any friction please take the cassette out and check if it is correctly positioned

B Loading the tape roll

Attention: Before placing the tape make sure the printer is turned ON and a ribbon cassette is loaded

1. Open the back lid and place the tape roll inside with the printable side up
2. The printer will now detect a tape roll is placed
3. Manually feed the first part of the tape until the printer detects it and starts to automatically feed the rest of the material

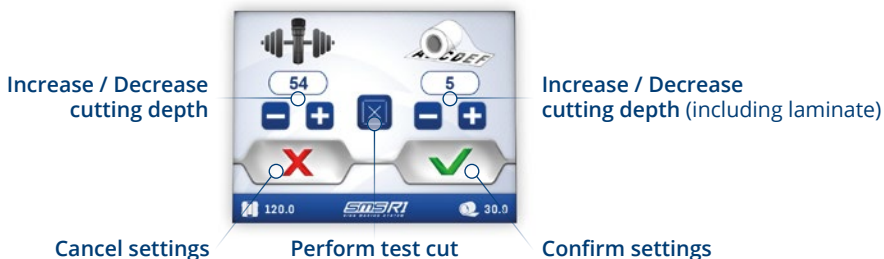

TOUCH SCREEN INTERFACE

4 TOUCH SCREEN CONTROLS & SETTINGS

The built-in touch screen lets the user control the printer and adjust certain settings.

Cutting settings

Our tape materials are pre-programmed with the recommended cutting depth settings. You should only change the settings if you notice that the current settings are insufficient.

General IP-settings

Automatic IP-address

Set fixed IP-address

Fixed IP-settings

Input numbers

Confirm / Cancel settings

THE FINAL STEPS...

5 THE FINAL STEPS

Congratulations, the printer is now all setup and almost ready for use.
